

CHRIST CHURCH

Church of England Secondary Academy

Yr 7 Music

Why we think this is important for you

We will then explore the elements of music through a variety of mediums and genres. Students will learn to analyse and describe the music that they listen to using music-specific vocabulary. They will begin to establish understanding of music theory through various notation, explore musical form and structure as well as identify instruments commonly found in a standard orchestra. With the stimulus of diverse music repertoire they will compose and perform in groups with the focus on effective music-making and transferable skills. Students will be given the opportunity to maintain and develop the invaluable skills of learning by ear, notation reading and rehearsing and performing individually as well as part of an ensemble. Students will be given the opportunity to compose and perform using their voices, body percussion, tuned and untuned percussion, ukuleles, keyboards and music technology. Some subject content will build on work from primary school, so please impress us with your knowledge and understanding.

What are the big ideas and concepts I will cover this year?

- What are 8 key elements of music?
- What is the difference between beat and rhythm?
- Perform and compose simple rhythm patterns to a steady beat
- Can you identify and perform notation using the keyboard?
- Identify repeated patterns through listening, composing and performance

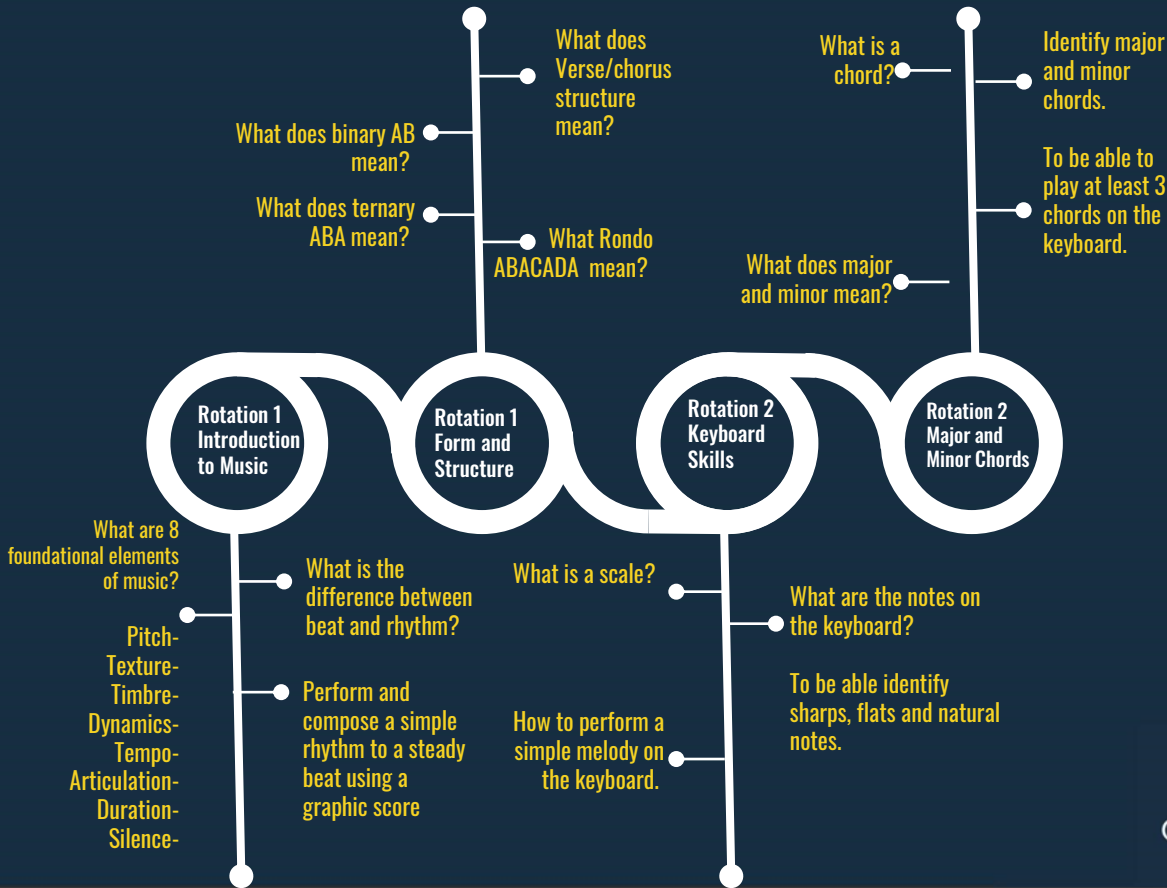

What am I learning about in Music this year?

How can I explore this subject and topic more?

BBC Bitesize Music, YouTube, Music Mark, Watch live or recorded music performances.

Careers links:

Musician, Composer, Teacher, Music Therapist, Record Producer, DJ and Music Director.
